

 Future Processing

Great software...
because we put people first

www.future-processing.com

I'm very happy with our cooperation. Future Processing delivers **a true added value** to our project. Team-wise they are offering a true **full-stack skill matrix with a great mindset and expertise** in agile software development. We accomplished to establish a true lean organisation, focusing on **high quality and reliability** of the system. The lightweight organisation requires only a very small overhead in steering and controlling the project, therefore enabling us to concentrate on the customer-facing business development.

ABOUT US

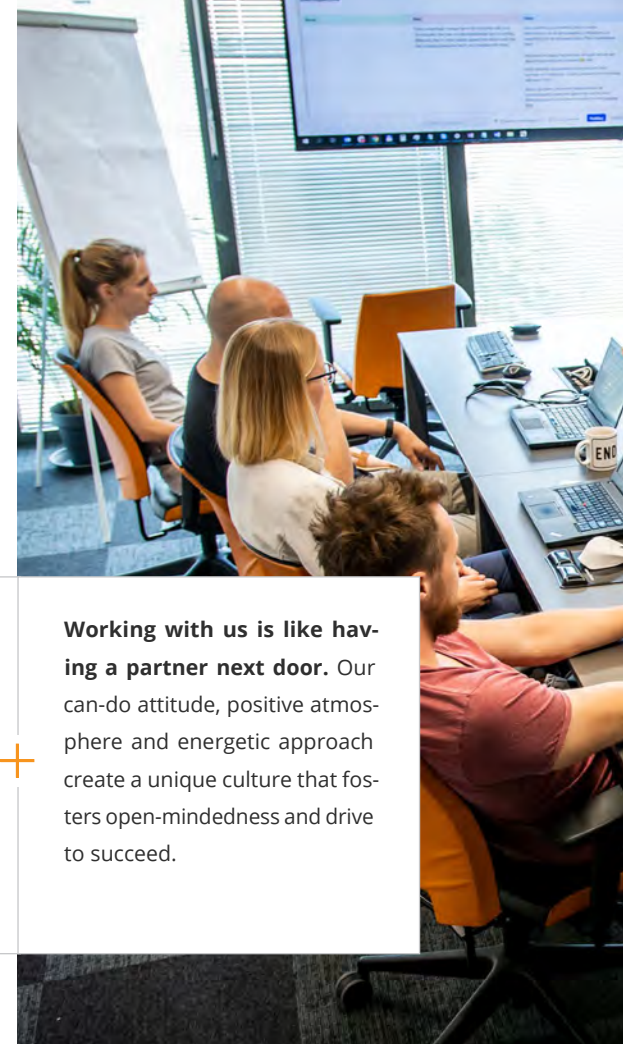

Future Processing

We're software development experts, who solve business problems using technology. For us, software is all about empowering people and organisations to realise their full potential. That's what sets us apart – we believe that great people equals great software.

We are software development experts who leverage technology and ask the right questions to bring you tangible results in the form of reliable, high quality, sustainable software that is delivered on time, right first time.

We build long-lasting partnerships through honesty, transparency and open communication. We are trusted with our clients' business and technology problems, delighting them with our talented, agile and adaptable team.

Working with us is like having a partner next door. Our can-do attitude, positive atmosphere and energetic approach create a unique culture that fosters open-mindedness and drive to succeed.

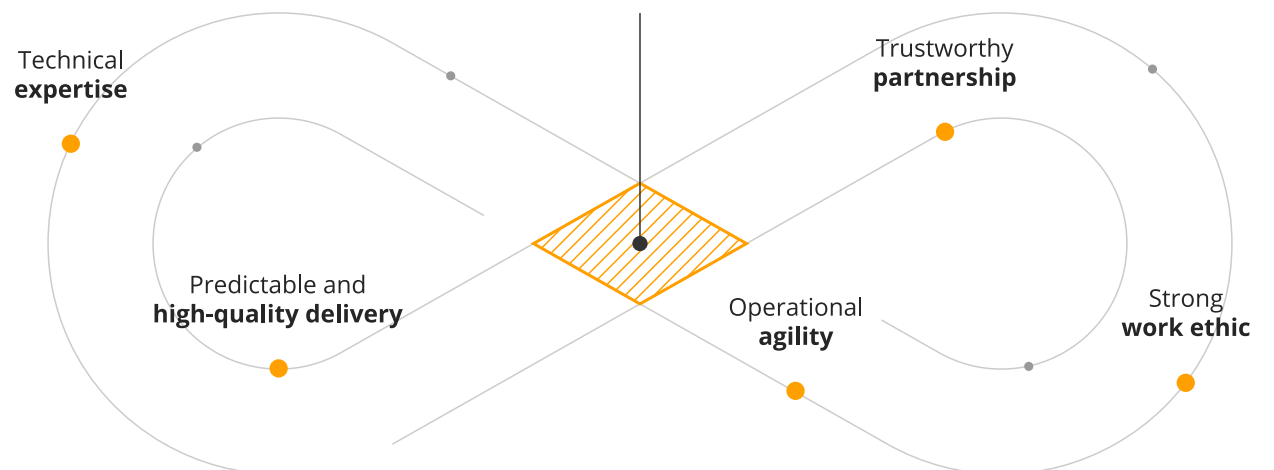

THE FUTURE PROCESSING WAY

How we deliver

Over the last 20 years, we have evolved our unique approach to delivering the best software for our clients. We call this **The Future Processing Way**.

The Future Processing Way is a combination of methods, tools and behaviours which helps our clients achieve great results through our partnership. It describes what you, as a client, can expect from us in terms of the way we work and it is based on 5 pillars.

WHAT WE DO

Discover our software services

Whether you need software engineers, a bespoke solution or technology insights, we can deliver.

Discovery & Strategy

Achieve your business goals with technology and get the product that is well adapted to your environment.

We offer workshops with all your key stakeholders, gathering requirements and design of a full solution with a roadmap for delivery.

IT Strategy Workshop Take part in a brief, constructive workshop for high-level executives and create a high-level IT strategy to achieve your business goals.	Discovery Workshop Evaluate, design and plan project with experts. Make better business decisions and get a detailed technical roadmap.	Design Sprint Create and evaluate your product together with end users before the development even starts. All these in just 5 days.	Software Audits Ensure your system is developed with respect to industry standards and protect the future of your businesses' most valuable assets.
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------

Software Development Services

Get a new bespoke solution, **improve the efficiency of your business**, enhance customer experience and generate more profit.

Choose one, **reliable IT partner** to manage the entire software development lifecycle process for you. From initial analysis to maintenance.

Dedicated Team Choose software developers and IT professionals hand-picked to address your project and business needs. Working remotely just for you.	Software Product Design Transform your idea into a product that attracts users and is well adapted to your business environment.	Software Development Get robust software solutions and achieve your business goal. We'll make sure you get what you're looking for.	Support & Maintenance Maintain higher availability and performance of your software with our engineers. Place it in expert hands.
-----------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------

Digital Innovation

Transform your ways of working and **make the most out of digital solutions**. Implement Machine Learning, Cloud or Data Science solutions in your business.

Let us be your secret weapon and **stay ahead** of the game.

Digital transformation Remove the barrier to digital for your business. Make strategic, organisational change through adoption and modernisation of technology.	Data Science & Engineering Transform your ways of working thanks to our specialists experienced in creating ground-breaking, innovative and data-based solutions.	Business Intelligence Visualise your data, analyse it, draw conclusions and predict events. Base your business decisions on the data driven knowledge.	Cloud Services Support your strategy and accelerate your business though secure, high quality cloud solutions.
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------

End to end solution = Full accountability

The Future Processing Way

Some of our projects

Development of a key system used by Marston Holdings – the UK's largest company providing judicial services, dealing with approximately **1.5 million cases annually**.

Development of a warehouse management solution for FareShare, a charity that aims to combat food waste and hunger. Thanks to the software, goods in warehouses are serviced even up to 1/3 faster and FareShare can help up to **500,000 of those in need a week**.

Implementation of a **blockchain-based system** that aims to revolutionise the financial sector, enabling crypto-financial operations for Smart Valor – a company recognised by Forbes **as one of Europe's 10 Most Exciting Technology SMEs For 2018**.

A learning organisation

At Future Processing we encourage development on a daily basis and undertake numerous initiatives that help us expand our qualifications and interests.

- we organise leading industry events and appear at national and international conferences
- we launched the **Quality Assurance path** at a local university and shared our knowledge in a subject we developed called **'Software development in a changing business environment'**
- we have our own training unit - FP Academy - thanks to which we improve our competences

Close cooperation
with local universities

Own Library
equipped with over 2500 technical and scientific publications

Group of Technical Expertise
with many years of experience

Contributing and participation
in industry events
