+500 complex projects delivered to help digitally transform
Embark on your digital journey

We invite you to embrace the digital World, draw from its opportunities and introduce innovation to your company. And this operational shift can only be done with a well-prepared strategy in place.

We’ve got 21 years of experience in moving businesses to the next digital level. We know that technology is the key to do so, but it is not everything. What you also need to succeed is a well-prepared transformation strategy, innovative thinking and data-based decision making.
Make **a change**

The digital transformation is a step-change. Plan it well and **benefit from your company’s development.**

Our experienced technology specialists, business analysts, UX designers and software architects will help you prepare **the strategy of transformation** and then design and implement new or modify existing solutions to meet changing business requirements.
Become digital

Digital transformation is not a one day change. It’s a process of step-by-step evolution. And together we can walk your company through it so that you can fully benefit from opportunities given by the newest technology.

We will provide you with software adjusted to your needs, developed in line with the highest standards and supported by specialists after its release. All this within a well-defined process with a whole variety of experts engaged in your project on each step of development.
Define **your goals**

The initial call gives us information on your **main goals and needs.** It is the moment when we decide on the workshop - depending on your project's phase it can be an **IT Strategy Workshop** or **Discovery Workshop.**

With workshops you can be sure your project is designed and built according to a defined plan.

You will **engage ground-breaking technology,** put your customers in the centre of the project and **stay one step ahead.**
What will you get?

- Recommendations with ideas to help you build strategy of your company’s digital transformation with stages tailored to your needs. All based on analysis of your main challenges and goals.
- Improvements of your solutions and business processes conducted with the use of cutting-edge technology.
- Experienced specialists from areas like Business Analysis, Automation, Data Solutions, Cloud, User Experience, Design, Machine Learning and Artificial Intelligence.
- The possibility to engage a whole team or chosen specialists as an extension of your in-house resources.
- Ability to adapt to the ever-changing market and your customer’s needs.
- Identification of opportunities for growth and innovation as well as selecting the best technology to achieve competitive advantage.
Embrace digital and **transform your business**

Now is the time to **run a thorough, well-planned digital transformation** process and let your business grow and develop.

We will challenge what needs to be improved and develop a plan going forward. All this with deep understanding of your operations and requirements. You don’t have to transform your business at once - we are here to identify the potential pain points and fix them one by one with adoption of dedicated modern solutions.

Join our business and technology specialists and walk with them through the **complete digital transformation process**.
Business digitalisation

Draw from its opportunities, become the innovator and shape the industry you operate in.

Digital Transformation combines business, technology and user needs into a collaborative solution. Draw from its opportunities, become the innovator and shape the industry you operate in.

We know how to engage your key stakeholders in workshop with our Business Analysts, Data Scientists, User Experience engineers and a great number of technology specialists.

We know what you need. We’ll deliver.
Legacy **modernisation**

Use innovation in modernisation of your existing software, **optimise costs, add flexibility**.

Does your current technology and systems do the job you need? If not, now is the time to work with us to take a step forward.

Use *innovation in modernisation of your existing software*, optimise costs, add flexibility to your organisation and align to the digital market due to our skills, capabilities and knowledge.

Our systems modernisation service has been designed to support you in addressing challenges as well as delivering high quality, long-lasting solutions.

Let’s move your company to the next level together and succeed.

According to IBM in 2019 we reached the number of 4.1 billion internet users. Even faster we observe the growing number of devices connected to the internet (IoT). The technology is constantly adapting to these changes and the cloud and technology providers work on new ways the data is being processed. The business needs to adapt in order to stay in the game.

Krzysztof Nykiel
Data Solutions Manager
What our clients say

We are delighted to have been part of this revolutionary analytics solution including adaptive questionnaire. We look forward to the next phase of development.

Future Processing understood our need, particularly as we embarked on developing a software application that would be groundbreaking in the area of behavioural analytics. They always delivered on time and within budget, with excellent support.
